Website Proposal for Dhananjay Joshi

Uncoded Hub
DIGITAL CRAFT

Prepared by **Deepak and Geetha**, Uncoded Hub | uncodedhub.com

Why you need a website

You asked why a website is needed when you already share photos on WhatsApp or Instagram.

High-end hotels, interior designers and architects choose art for their projects and need to show options to their clients. On WhatsApp, photos get lost or look compressed. With a website, they can open your link on a phone or iPad, view your frames on wall mockups of lobbies, living rooms and offices, and share it with the decision-maker. It also shows that you are a serious, professional fine-art studio.

How a customer places an order

We offer two packages tailored to your business model:

Package A: Gallery + WhatsApp Enquiries RECOMMENDED START

The buyer chooses a photo, size (for example 20×30") and frame, then taps **"Enquire on WhatsApp"**. You get all the details on your phone and discuss price, advance payment and delivery directly with them.

Package B: Online Catalogue + Razorpay + Customer Records

The buyer selects a frame, enters the delivery address and pays online by UPI, card or netbanking. Customer details and the ordered frame are saved in a private list that only you can access, so you build your own client list.

Adding new wildlife photos yourself

Yes. We will set up a simple private page where you pick a photo from your phone or laptop and add it to your website. No technical skills are needed.

Investment & Deliverables

Clear, fixed-scope pricing with zero hidden costs
